Hi-Spec Supplies are a family owned and managed company based in the manufacturing heartland of the West Midlands with 30 years of experience in the high quality manufacture and supply of doors, windows, conservatories and home improvement projects.

We are the manufacturer of the Hi-Spec Composite Door, which is designed by DOORCO exclusively for the UK market. The unique designs and construction have made it a door product of choice within the retail, new build and replacement housing construction sectors.

We have built our reputation on quality service and customer satisfaction to bring you the Hi-Spec Composite Door. The Hi-Spec Composite Door offers a high level of security, with increased resistance to forced entry, excellent thermal efficiency and reinforcement with GRP skins as standard. The GRP outer skin requires very little maintenance, and a quick wipe down with a damp cloth will keep the door looking like new and it never requires painting.

All our composite doors are supplied pre-hung in steel or (RTR)

Recycled Thermal Reinforcement bars with a UPVC outer frame that is energy efficient and offers excellent thermal properties.

All of our doors are fitted a PAS24 compliant multipoint locking system and we also offer a number of enhanced security options. All Hi-Spec Composite Doors have 25 years structural guarantee.

We currently have twenty traditional styles and ten contemporary styles offering our customers the best choice for their home, our unique Inox range with stainless steel glazing covers add an exclusive 'Designer Hi-Spec' style. We also offer disabled access compliant thresholds to Part 'M' of the building regulations, making it easily accessible for disability access.

Thermal Performance

Composite doors are much more thermally efficient than either timber or PVC, and our doors are manufactured to the highest quality standards, making them more thermally efficient by design.

The warm foam core allows the door to have a significantly better 'U' value than traditional timber doors, PVC skinned timber doors and steel doors, and our entire range meets with the requirements of the current Building Regulations.

There are various upgrades to glass options which increase the thermal performance of the door. The combination should keep your home warmer and could help reduce your energy bills.

Security - Keeping You Safe

We take security very seriously so we invested some years ago in a new breed of composite door with significantly improved security features, which stand up to current and future security standards, including PAS 24 in line with Approved Document Q for new build.

We recommend the use of multipoint locks as standard (which should be engaged at all times and not left on the latch) as well security hardware including TS007 standards, and high security cylinders with anti-pick, anti-bump and anti-snap capabilities. On certain styles we

would also recommend a high level, multipoint, slam shut lock with key entry plus security escutcheon, providing a traditional rim latch lock.

Glass units which comply with Approved Document Q must contain one pane of class P1A (EN356) glass, which must be 6.8mm. security laminated. This is available as an option on glass within our doors at a reasonable additional cost.

Colours

With our high performance paint technology and in-house paint line, we can offer a wide range of shades for all of our doors which can even complement the colour options on frames, and so providing a fantastic choice for the home. In most cases the doors come in white as standard on the internal side, however, for your own individual requirements we may be able to offer different or bespoke options, so please speak to your retailer for more information.

Glass and Glazing - Making a Personal Statement

The visual impact of your door is enhanced by the choice of glass within. Depending on the style, you will have either a double or triple glazed unit, but all units are supplied as Energy Plus, incorporating 'Low E' glass and Argon gas filled. The glazing cassette system is re-glazeable and has passed the PAS 24 security attack tests. For back door applications you can even benefit from an integrated Venetian Blind, incorporating child-friendly, unobtrusive finger control and no loose cords.

Performance

Our door offers a truly appealing finish for the entrance of any home, with a high definition embossed and grained GRP outer skin which will look stunning for years to come. The door offers stability from the elements with its inner core of LVL encased with composite stiles and rails for protection against any water ingress. Our doors usually have a grained PVC edge to the hinge and lock side in either white, stain or paint finish.

The inner core is manufactured from high density polyurethane foam, which offers exceptional thermal efficiency and will help to reduce energy bills in comparison with traditional wooden, steel or PVC skinned solid core doors.

Composite Construction and GRP Skins

Manufactured using grained reinforced GRP skins, our industry leading composite door slab is the closest in appearance to wood, but without the associated maintenance requirements. Maintaining the kerb appeal of traditional timber, the construction of our door surpasses other alternatives, incorporating an LVL (Laminated Veneer Lumber) subframe to provide the strength and rigidity required for modern homes. The door protects you home from the elements, but will have minimal thermal expansion and contraction rates under extreme temperature variations which is perfectly normal. The PU foam core meanwhile reduces heat loss, providing a high level of thermal performance.

Reglazeable Cassette System

The industry leading TriSys glazing system from ODL Europe, is a company with a 10+ year heritage in innovation, quality and added value. The game changing, 3 part TriSys glazing system allows easy installation of the glass option, and easy replacement if your choice of glass design were to change, or a breakage were to occur, without changing the front door.

Decorative Glass

RegaLead is the largest supplier of decorative components to the glass and door industry, trading in more than 80 countries. The company offers the widest range of traditional and contemporary glass designs, so our customers have infinite options for their front door. As well as being market leaders, innovation is key, with glass specifications providing the lowest U values of any decorative glass on the market; compliance with Document Q P1A (EN356) on Security Plus units, and the pioneering stainless steel Inox glass and glazing systems.

Glass Colour Options

Certain glass designs lend themselves to colour co-ordination of the glass to complement or contrast your choice of door colour. These are indicated by the above symbol.

Caming Colour Options

The Simplicity decorative glass is available in either Zinc or Brass coming to complement your door furniture. It is indicated by the above symbol.

Integrated Venetian Blind

Cleverly encapsulated within the insulated glass cavity, the Venetian blind provides a zero-maintenance solution to our Lytham door style. The blind can be easily raised, lowered and tilted using the unobtrusive fingertip control on the edge of the frame.

Suited Furniture

A range of suited door handles, letterplates, door knockers and numerals are usually available, in chrome, gold, white, black and, style dependent, a selection in stainless steel which will be advised at point of order.

Security

We recommend all doors should have the most up-to-date security hardware fitted, including multipoint locks and high security cylinders - currently specified as grade TS007.

Low Threshold

The majority of doors will be fitted with a thermally broken, low threshold option, which should be Part M compliant. There may also be the option of full frame and PVC cill combinations.

Traditional Door Styles

Contemporary Door Styles

Sidelight Options

Door Colours

Our colour collection has been specially designed to help you put together the perfect colour palette for your door. Every home is different and our beautiful range of colours combines both muted heritage shades and bolder vibrant options, to harmonise with your home and keeping it looking good for years to come.

Standard Colours

We offer a range of 4 external colours with a white interior as standard. Coloured both sides is available as a cost option.

Premium Colours

Our range of 34 premium colours are created using state-of-the-art coating technologies as used in the yacht industry and maintain the grained timber effect to the door skin. The paint has been prepared to the recommended gloss level which range from a Semi-Matt, Satin or Semi-Gloss sheen dependent upon colour. Door colours and stains shown in this brochure are for guidance only, however due to the nature of the material, batch and print restrictions there may be a difference between them which is unavoidable and for which we cannot accept any liability. We offer a chargeable swatch service for customers who require an individual swatch for guidance.

Decorative Glass Options

Decorative Glass transforms doors and makes a personal statement and we offer a range of styles to suit all budgets and tastes from the contemporary to the traditional. All our decorative glass is manufactured to the highest possible standards and can come as Energy Plus incorporating 'Low E' glass and Argon gas to give a centre pane 'U' value of 1.1 and to ensure that all our doors meet Door Energy Rating level of B as a minimum.

Signature: Dorchester

For a traditional Victorian look, Dorchester is the perfect choice combining vibrant 'Spectrum Glass' with textured glass and traditional lead. Available in 3 border colour options: Amber, Blue and Green.

Signature: Reflections

Stunning black chrome cameing combined with satin and grey bevelled glass pieces, Reflections makes a classy yet striking statement encapsulated inside a double glazed unit for ease of cleaning.

Signature: Modena

A modern twist on a traditional technique Modena combines hand cut textured glass pieces, contemporary fused glass elements and polished zinc cameing.

Signature: Matrix

Laser-cut stainless steel elements incorporated into a modern, polished zinc, linear design. The striking steel pieces are beautifully offset against a background of 'Rain' glass and small bevelled glass elements.

Signature: Simplicity and Elegance

Both Simplicity and Elegance have proven to be hugely popular designs combining a combination of textured glasses with hand cut polished bevelled glass which sparkle in the sunlight. Simplicity is available in either Brass or Zinc came options.

Signature: Classic and Flair

Simple yet classic designs that will suit any home. Both Classic and Flair are a combination of gently patterned glass with sparkling bevelled glass pieces encapsulated inside a high-performance double glazed unit.

Signature: Zinc Star

Simple in design, Zinc Art Star combines glue chipped star bevels with a zinc coming. The decorative bevelled elements stand out from the neutral obscure glass that surrounds them in striking fashion.

Etch Art: Murano

Combining etched glass with hand-made 'fused glass' elements, our Fusion Art ranges are a truly modern decorative glass option. Available in 5 colourways to complement or contrast with the door colour: Black, Blue, Green, Purple and Red.

Etch Art: Tahoe

By combining Fusion glass tiles with small stainless steel elements and etched glass, Tahoe is a strikingly modern glazing option that is ideally suited for contemporary doorsets. With a range of five colour options, Black, Blue, Green, Purple and Red, the glass can be manufactured to complement your door colour beautifully.

Etch Art: Linear

The simplicity of brilliant clear lines combined with soft satin glass gives Linear a classic appeal that suits both traditional and contemporary door styles. Only available in a limited range of door styles.

Etch Art: Designer Etch

The delicately shaped clear glass bevels glisten against the etched glass surround and create a look of understated and tasteful elegance. With its coloured Blue, Green, Grey, Purple or Red borders to complement your door colour, Designer Etch allows you to harmoniously personalise your glass and door.

Etch Art: Roma

An imaginative fusion of linear design and bold sweeping curves. The Roma design with sparkling glass bevels, are set against a background of etch-effect glass to create a stunning modern design.

Etch Art: Kensington

The Kensington range of glass is simplistic, but elegant. The clear border combined with satin centre allows just the perfect amount of light to flood through the entrance of your home.

Etch Art: Montreal

Sandblasted and Millennium glass are separated by an off-centre clear dividing line offering a stunning, yet clean contemporary look to your door.

Etch Art: Eiger

This European style design is produced using high grade brushed stainless steel elements, that are bonded to the centre pane of glass using a specialist technique. The combination of steel and etched glass provide a unique contrast.

Etch Art: Tacoma & Yukon

The Takoma and Yukon ranges of glass are designed to focus on European styling that suits the door that surrounds them. Contemporary, clean, simple etched designs that have proved very popular when creating that modern feel.

Etch Art: Quartz

A stunningly simple design, Quartz is created using hand cut glass centres, that are polished and bonded within a clear border. The contrast between texture and etch offers a beautiful combination.

Etch Art: GridLite Etch

Simulated divided lights create the look of individual panes of glass, whilst maintaining the performance benefits of a single double glazed unit. Selectively etched panels ensure privacy without sacrificing natural light.

Crystal Art: French

Using patented technology that allows for an incredibly intricate bevelled effect design, French also has enhanced security and sound insulation due to the materials used in their manufacture. Available in: Emerald, Onyx, Ruby and Sapphire.

Crystal Art: Havana

Sophisticated, contemporary design incorporating various glass textures with clear 'came' lines. Havana is a twist on lineal Art Deco period style that is appealing, and provides insulated units with excellent acoustic values.

Fusion Art: Symphony

Taking a 2000 year old glass technique of melting coloured glass together, our Fusion Art products are then triple glazed inside a high performance insulated glass unit to give the highest levels of thermal efficiency.

Fusion Art: Cielo

The Cielo design is vibrant and visually stunning. Vividly coloured glass pieces are mounted on to a textured background, and fused together at high temperatures. Once cooled, the decorative element is triple glazed to create a high quality sealed unit. Available in Black, Blue, Copper, Green and Purple colour options.

Fusion Art: Fuego

Fuego is a bold design that stands out from the crowd. Specifically designed for the Paris and Biarritz style steel door, this modern fused glass range enables you to perfectly complement the glass with the door. Available in five colour options, Black, Blue, Copper, Green and Purple.

Fusion Art: Lucero

Each piece of glass in the Lucero range will be unique due to the wispy random effect within the coloured fused glass. We use the chosen colour as the prominent feature in this design, then cut through it with a solid black stripe, creating a wonderfully contrasting piece. Available in Black, Blue, Copper, Green and Purple colour options.

Fusion Art: Lindeza

This unique design is crafted by adding cut fusible glass pieces, and randomly placing crushed glass frit in a complimenting colour around them. This design is available in Black, Blue, Copper, Green and Purple and has a softer, rippled effect textured background.

Resin Art: Bullseye

We have taken the traditional bullion and created a unit that is suitable for use in a modern door. With its deep, effective circular indentations, this will enhance any cottage style door, while maintaining the desired aesthetics.

Overlay Art: Diamonds

A simple yet classic design that continues to be a favourite and complements anything from a country cottage to a smart town house. With a choice of either bevelled glass or a range of six vibrant colourways in either Blue, Green, Grey, Frost, Purple or Red, combined with a wide range of textured glass backing options, Diamonds is destined to become everyone's best friend.

Millennium

Millennium is a totally different and modern way of adding obscurity to any door. Lineal etched lines cascade down both sides of the glass offering a real depth and decorative dimension to the glass.

Technical Specification

DoorCo 44mm Door

- > Grained GRP SMC skins are available in a wide variety of styles and colours including wood stains
- > Stiles and Rails are manufactured from a water-resistant polymer
- > LVL is used as the main internal reinforcement
- > Skins and sub frame are bonded with a Urethane Adhesive Resin
- > The door is filled with CFC-Free Polyurethane Foam density 44.5 - 45.5kg/m³
- > Superior heat and sound insulation
- > Complimentary choice of grained reglazeable cassettes
- > Centre Pane Value of approximately 0.44
- > Doors have exceeded the requirements of PAS24
- > Q-Marked with full manufacturing traceability

Glass

All the double and triple glazed units used in our doors are manufactured to the highest standard and come with internationally recognised accreditations for performance, strength and thermal efficiency.

High Performance Units

All units are made with toughened glass to comply with EN12150, the International standard for safety glass. All units are manufactured to the EN1279 standard for quality of seal and life expectancy and come with a manufacturer's 10 year warranty.

Thermally Efficient

All the glass in our range comes with Energy Plus as standard. They are manufactured using Pilkington K low emissivity glass and the airspace is filled with Argon gas to give industry leading thermal efficiency. In addition we only use warm edge spacer systems with Superspacer and DecoSeal.

Security Option

All our glazing options can be supplied with a Security Plus upgrade where the outer pane of toughened glass is replaced with breakthrough resistant laminated glass.

Care and Maintenance

Your new door should keep safe and secure for years to come however with all products and especially those that are exposed to the elements we recommend that you carry out a care and maintenance routine.

- > Door frames should be washed with warm soapy water; however stubborn stains can be removed using specialist PVC-u cleaners and by following the manufacturers' guidelines.
- > The door leaf should only be cleaned using warm water or non-aggressive composite door wipes. No solvent-based product or abrasives should be used as these will damage the surface of the skin.
- > External glass should be cleaned with warm soapy water and cleaned with a proprietary glass cleaner.
- > Hardware can be cleaned with a mild detergent and wiped clean. No harsh chemicals or abrasives should be used.
- > Maintenance of the door may be required to maintain any guarantees from the installer. Hinges should be lubricated with engineering oil. Cylinders can be lubricated with Teflon-based products only, as other oils may cause degradation. If necessary, a small amount of lubricant can be applied to the moving parts such as letterplates, handles and knockers.

UPVC Doors

The front door is the first impression that anyone gets of your home. The addition of a replacement double glazed uPVC door makes sure that it gives the right impression. Doors come in many different styles from the more ornate doors to the simple and stylish doors – the choice is as individual as you are.
